

Hi Friend,

Jeff Davis here, and I'm going to address something that drives me crazy on a daily basis...

And that problem is, how do you redirect people to clickbank products

Without having your affiliate id hanging out in the breeze...for anyone to hijack...

Because here's the deal...

If you go to clickbank:

Home | Sign Up | **Marketplace** | Order Help | Blog | Log In | Search

**CLICKBANK**

Sell Products | Promote Products | Buy Products | About Us | Help Center

We've paid our clients on time, every time, for 10 years. Client Earnings Paid Out: \$1,595,734,132

English

## Live Outside the Box™

Our clients have earned over 1 billion dollars. It's your turn.

### Affiliates

and you click the "marketplace"

# Blogging Sucks!

You can chose products to promote...but here's the rub...

The screenshot shows the ClickBank Marketplace interface. At the top, there's a navigation bar with 'Home | Sign Up | Marketplace | Order Help | Blog | Log In' and a search bar. Below this is a red navigation bar with buttons for 'Sell Products', 'Promote Products', 'Buy Products', 'About Us', and 'Help Center'. The main header area includes the 'Marketplace' title, a 'Find Products' search bar, and a language dropdown set to 'English'. A sidebar on the left lists various categories, with 'Business / Investing' selected. The main content area displays a list of products under the 'Business / Investing' category. Each product listing includes a title, a brief description, 'Stats' (Future \$, Total \$/sale, Avg %/sale, %/refd, Grav), and a category. A red arrow points to the 'Promote' button for the 'Infamous Rich Janitor System' product. On the right side, there are 'Sponsored Links' for various high-paying offers.

**Blogging Sucks!**

And you click promote...

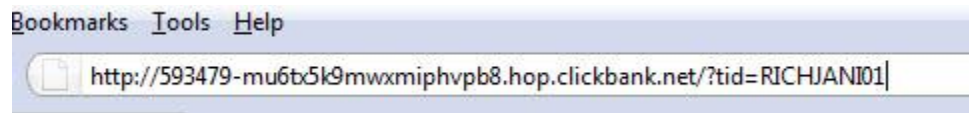

you get this ridiculous gobledgook link...

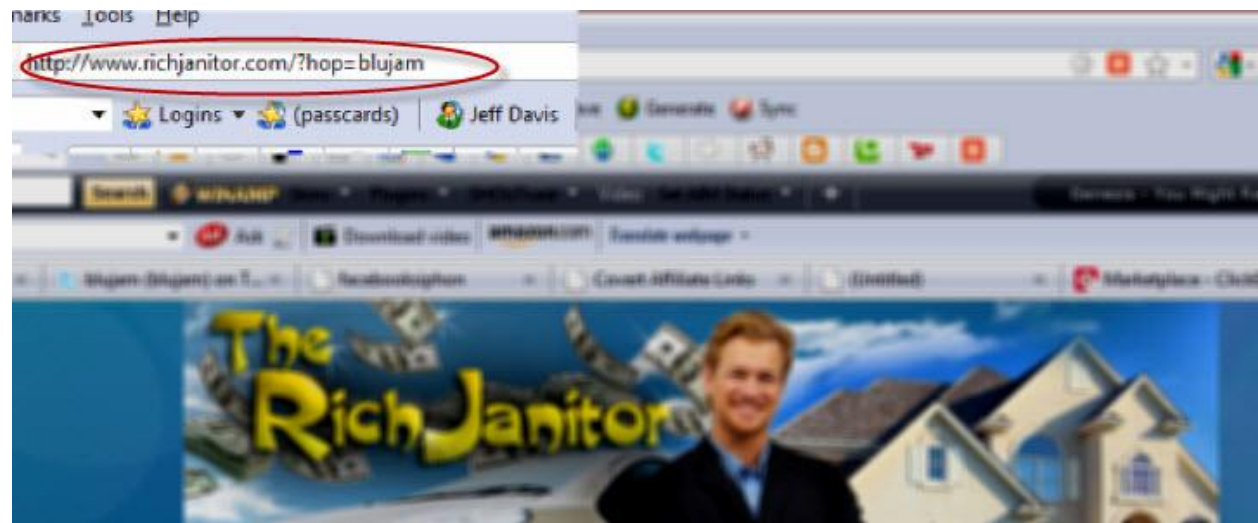

**Blogging Sucks!**

So...if you take that link and punch it in your browser to test it out...

ok this is nice and scrambled, right?

You hit enter, to test the link...

And it converts right back to the same nonsense you were trying to get rid of in the firstplace!

WTGFADFAEA!#!\$!#!@#R\$!@#!@\$@#\$\$!!!!!!

It blows my mind that clickbank is such a bunch of clowns...

Don't get me wrong, I love clickbank, and clickbank checks!

But this drives me round the bend...

Ok, what to do...

This is completely ghetto, and requires an html editor, or text editor,

And a FTP client, for your server...

**Blogging Sucks!**

1. We want to create a directory on your sever in the public\_html folder.
2. Name it anything you want, so you can remember what product it was that you are promoting.
3. We want to create a file called index.php and insert it into that folder
4. Copy and paste this line of code
5. `<?php header( 'Location: http://yourcbid.vendorname.hop.clickbank.net' );?>`
6. Basically insert your cb link stay inside the ' mark (my hi-liter is one character over)
7. Upload index.php to your folder on your server
8. Test <http://yourserver.com/yourfolder/>
9. It's fast, isn't it?

And it should work like this:

<http://forexplatinumclub.com/utb/>

You can repeat this process, as many times as you like, just create a new folder, and insert index.php, and you are good to go.

The browser reacts so fast, nobody has time to jack your link... and that way you'll get credit for your sales!

More money in your pocket!

I hope this helps!
