

Hi Friend,

Jeff Davis here, and if you have an online business then you know you should be video marketing to get the attention of the millions of video viewers who are online every single day.

It is widely known by all the top Internet marketing gurus and experts that Video marketing is an essential part of marketing success. Even Frank Kern, Brad Fallon, Mike Filsaime, John Carlton and many others use video marketing as a core part of their product launches and to keep their customers up-to-date with all their latest going's on.

The bottom line, if you are not using video marketing in your business you are leaving a lot of money and opportunity on the table and who can afford to do that in today's economy?

Don't worry if you know nothing about Video marketing or have been unable to make video marketing work for your business, there is a simple answer...

Unless you have been hiding under a rock then you know Sean Donahoe's "Video Assassin" course released early in 2009 was one of the most successful video marketing courses ever released.

[Video Assassin](#) received much critical acclaim from Video marketing experts and top Internet marketers across the world who all agreed "Video Assassin hit's the Bullseye!"

Well, not content to stop there, Sean has spent the last few months refining and fine tuning his system into a deadly video marketing weapon that is even more powerful and profitable than ever.

After the release of the first version, Sean gathered a ton of feedback from his customers and decided to release a second "all improved" version that make's it even easier than ever to unlock the raw power of video marketing and tapping into the floods of traffic it can drive to your website with just a few minutes of your time and no expensive equipment or experience what so ever.

What impressed me with the first version was the depth of knowledge and potential Sean demonstrated and I can say that Version 2.0 still blew me away.

Without giving too much away, I can say that Sean has outdone himself and even shares some of his most profitable niches with us. I asked him “Why on earth would you do this?” as most marketers closely guard their most profitable income streams and his reply was simple.

“I want people to be able to take this system and be able to use it as soon as they have finished the guide and start making real money right away. Video marketing has been one of my main money makers for quite a while now and I am amazed at how many easy markets I am able to dominate at any one time.

The money literally pours in month after month and honestly, I am kicking myself for now doing this years ago.” He explained. “People too often buy a guide or report then forget it, it collects dust on their hard drive and then they wonder why they are unable to make any money, it’s sad.”

So, what’s new in [Video Assassin 2.0](#).

Well, where do we start.

The guide is 100+ pages of raw power that will have you creating profitable videos very quickly indeed.

Sean goes “Step-By-Step” through the entire video marketing process including unlocking the elite profit streams that the top end Internet marketers use (Sean included) and how you set yourself up for complete success.

Unlike many guides and reports out there, Sean takes a very “Business” like approach that shows just how professional he really is and why he has been as successful as he has been.

He has also included a ton more free resources and bonuses (over \$500 worth) and over 2hrs of powerful support videos that were not included in version 1. This allows you to look over his shoulder as he explains how to perform real market research and create profitable videos in just minutes.

All in all, the Video Assassin 2.0 course is more powerful than ever and you can bet that I will be putting it to good use for my business and you should too.

Heck, I could write a report going over the benefits, and features and tell you why you should add this to your marketing arsenal but you should already know that you cannot ignore Video marketing and why you should get this course.

Go check out what Sean has to say about it in this quick video that really goes into more depth that I ever can...
