

Hi Friend,

Jeff Davis here, and I want to talk about what's been working for me in 2010...

First of all, I love [aweber list management system](#), because my html emails turn into web pages, and are tweeted, automatically.

[That is scooped up by google and ranked for my keywords...which generates sales from organic traffic]

Second, is the fact that I can schedule ad swaps, and launch sequences.

Third, I like to cloak my affiliate links, to protect my commissions, from poachers.

Clickbank's link cloaking does not work for me, because my affiliate id is still hanging out, once the link is executed in the browser.

I don't like that.

I have been using [Phantom Link Cloaker](#) and it has been doing a fine job, and provides good statistics on my campaigns.

I think that Phantom Link Cloaker is the best at what it does, and I love the way that you can "name" your links.

I highly recommend that you grab a copy, and start tracking your links the easy way.

Now for my wordpress friends, if you have a blog, and you want a cool free plugin:

My Clickbank Stealth Bonus is running out, I only have 37 left...so grab yours today!

I'm writing this pdf in my google account, and I'm finding that it's very handy for creating pdfs which I can then load to my amazon account for easy access...

This makes me happy because it will allow me to be more creative in my marketing...

Here's how you can make money online, the free way, mostly...just don't do adwords, lol.

so, there you have it...it's not rocket science...I just wanted to share a representation of the marketing that I do...

and you can too...

you just have to apply yourself, and learn to feed the google monster, what it wants, which is fresh content, such as this book, that I'm writing right now.

The only other secret weapon that I have incorporated in my

blogs, is the onlywire plugin...which automates social bookmarking.

Well I've spilled the beans, I hope you take and run with what I've revealed here today, and make your move...

Talk Soon,

Jeff Davis

P.S. Here's another great book to jumpstart you today:
